

### Exercise Skull comparison

1) **Out loud**, explain if these skulls belong to human lineage and why.

Help => use document 3: Human And Chimpanzee skeletons comparison.

Keywords: teeth/canine, prognathic, brow ridge, occipital hole

1st specimen:

2<sup>nd</sup> specimen:

- 2) Compare these two skulls. Are they really different? What can we show about the relationship of these two species?

Fetal Chimpanzee skull

Fetal human skull

- 3) Try to identify the 4 mystery skulls:
